How Does BizDex Work?
[Home > How Does BizDex Work?](#)

The animation and supporting text gives a high level overview of the Biz standards to the transaction flow between trading partners.

The architecture is built on open, non-proprietary standards and is available to all software producers. This makes the framework open to competitive pressure and allows the framework to be used by a wide range of organisations. BizDex is a public good, and is available to all organisations. BizDex is a public good, and is available to all organisations.

- 1
 - 2
 - 3
- Service providers recognise opportunities to build into public community standard and place them in the application by spreading the cost of integration work.
